

In today's fast-paced business environment, conventional paper-based forms management is no longer enough. In addition to being slow and inefficient, manual-based processes result in sub-optimal data quality, increased costs and expose your organization to fraud and security risks as forms pass through multiple human contact points.

Allstream's Digital Ink Solutions provide instant electronic capture of handwritten information for all your business forms using digital pen and smart paper technology. Handwritten data is converted into application-ready ASCII formats to enable instantaneous business workflow, accurately capturing written information from paper-based business forms without having to re-key or scan the document.

Business Challenge

Digital Ink delivers accelerated workflow with real-time access to handwritten information:

- Q/A and safety inspection forms
- Assessments
- Data collection and reporting
- New account opening
- Credit applications
- Signature capture
- Insurance forms

- Weigh label / manifest
- Drivers' logs
- Meter readings
- Visitor log registrations
- Time sheets and much more!

Business Benefits

Organizations that adopt Digital Ink experience a wide range of benefits. By eliminating human touch points, data is entered into enterprise systems in a virtually error-free manner. At the same time, employees gain real-time access to electronic documents and information, leading to significant and measurable workflow cost savings.

Allstream's Digital Ink Solutions integrates into your existing workflow and business processes without interrupting the normal course of business. As a result, user acceptance of the technology is generally universal, enabling rapid deployment throughout the enterprise.

Plus, with enterprise-wide traceability and time-stamped data, organizations are more prepared to meet today's increasingly stringent electronic auditing requirements. Digital Ink Solutions are a critical component of U.S. Sarbanes-Oxley Act and Canadian Bill C-198 compliance.

Why Allstream?

Allstream is North America's leading Digital Pen and Paper solutions company. Since 2003, we have forged the Canadian revolution in Digital Ink business solutions and provide the only full-time team of certified specialists in this emerging technology field to service a growing installed base.

Allstream also boasts the most comprehensive partner network and solutions portfolio: with pre-printed forms, forms-on-demand, tablet PC and wireless solutions.

Our partners include: Mi-Co Corporation; Anoto; Rogers Wireless; Nokia; and Grenville.
